REVOLUTIONIZING DERMATOLOGY EDUCATION

South Beach Symposium

clinical + aesthetic dermatology

For exactly two decades, the South Beach Symposium (SBS) has served as the benchmark for other educational conferences: offering attendees the opportunity to learn transferrable skills, real-time clinical pearls, and best-practice techniques that can easily be adapted into their practices. SBS provides comprehensive education for practicing medical professionals to stay informed on the newest therapies, technologies, procedures, and practice guidelines in medical dermatology, cosmetic dermatology, and aesthetic medicine. Founded in 2002 as an annual clinical and aesthetic dermatology conference held in Miami Beach, SBS has since launched its online educational resource center, which serves as a forum for busy practitioners in continuing medical education activities.

SBS provides attendees with an integrative and comprehensive solution to aesthetic and dermatologic medicine. Through a carefully tailored curriculum that addresses all skin-related conditions, risk factors, treatments, and the ways in which they interact, SBS's history is firmly rooted in connecting experts to share ideas and foster collaborations. The program agenda is consistently rooted in cutting-edge scientific research, while translating the latest advances into practical, applicable approaches for any practitioner in the field of dermatology or aesthetic medicine. SBS prides itself on continuously providing innovative methods of education through highly interactive formats, including live demonstrations and interactive panel and roundtable discussions with world-renowned faculty presenters.

Our History

Since its inception in 2002, the South Beach Symposium has provided the most instructive and impactful education in medical & aesthetic dermatology to thousands of physicians and healthcare providers. In the last 20 years, SBS has grown to become the most clinically current conference in a vast sea of dermatology meetings. SBS has distinguished itself as the conference with the most well-respected faculty presenters and clinicians, coupled with the most helpful and interactive live workshops & patient demonstrations: providing an extremely focused meeting experience for all attendees. With the key opinion leaders in the field of dermatology present each year, there are ample opportunities for dermatologists, plastic surgeons, PAs, NPs, and office managers to learn the latest therapies, technologies, procedures, and practice guidelines in the field. Our educational reach surpasses our live meetings, as the live patient demonstrations provide a unique opportunity to view specific procedures and techniques that can immediately be implemented into practice after the meeting concludes. Moreover, our website's online education ensures that audience members can continue their educational journeys far past the walls of Miami Beach's Loews Hotel. SBS is exceedingly proud to announce its 20th Annual meeting, and continue its tradition of providing clinicians with continuing medical education, clinical pearls, and strategies for enhanced patient care.

A PEDIATRIC FOCUS: Masters of Pediatric Dermatology (MOPD)

The Masters of Pediatric Dermatology is a one-day meeting which precedes the SBS Meeting on its first day and solely focuses on the conditions and treatments in pediatric & adolescent dermatology. The MOPD Symposium was initially developed 30 years ago to promote and advance education surrounding skin diseases & disorders in pediatric age groups, and foster an exchange of information between physicians and health professionals interested in the field of pediatric

dermatology. Attendees will learn the latest treatment approaches, protocols, procedures, and tools needed to support children with dermatologic conditions, and ultimately provide better, more personalized care for this specific population of young patients.

Hosted by Lawrence A. Schachner, MD, Co-Director of the Division of Pediatric Dermatology at The University of Miami Miller School of Medicine, the MOPD brings together world-renowned

experts in the field of pediatric dermatology to lecture on the latest advancements. The MOPD expanded in 2020 to include 2 days and will take place August 11 & 12 (Thursday-Friday). MOPD will focus on: eczema, psoriasis, vascular lesions, hair, acne, warts & molluscum, and other critical topics in skin infection and disease within childhood & adolescence. This session is available for individual purchase, or included within the purchase of an SBS main meeting registration.
