

South Beach Symposium
February 9-12, 2023
Miami Beach, FL

Activity Overview

Target Audience

This symposium is designed for an audience of physicians, physician assistants, nurses and professional staff members of medical practices specializing in dermatology, pediatric dermatology, plastic surgery, cosmetic surgery and other dermatologic medical procedures.

Learning Objectives

Upon completion of the educational activity, participants should be able to:

- Discuss new and emerging therapies for the treatment of acne
- Review the safety and efficacy of new and emerging targeted therapies for treatment of AD
- Interpret clinical safety and efficacy as well as expert recommendations for alopecia areata therapies
- Evaluate the efficacy and safety of therapeutics and procedural interventions for hair restoration in patients with androgenic alopecia
- Review clinical safety and efficacy data for new and emerging agents for treatment of psoriasis
- Develop individualized treatment plans for psoriasis patients based on expert recommendations and patient factors
- Outline the safety and efficacy data for new and emerging therapeutics for PsA, including biologics and small molecules
- Discuss updated treatment options, including clinical efficacy and safety, for patients with vitiligo
- Summarize treatment options for wound healing, including preventative measures to minimize scar formation

Criteria for Success

Certificates of completion will be awarded based on the participant's attendance and submission of the activity evaluation/claim credit form at www.southbeachsymposium.org You must participate in the entire activity to receive credit. There is no fee to participate in this activity. If you have questions about this activity, please contact AKH Inc. at tbrignoni@akhcme.com.
